BVB COLOURS

PRINT	COATED	**Designation for coated paper.**
	PANTONE C	**Spot colour for printing on newspaper.** PANTONE® is a standardised colour mixing system in which one or more out of 14 solid colours are mixed and then printed. These are known as spot colours. Like a colour pot with a finished colour mixture and very slight colour variations. The C stands for "coated".
	CMYK	**Realistic print colour space.** CMYK is the most popular colour system for offset printing, digital printing or even laser and ink jet printers.
	UNCOATED	**Colours printed on uncoated paper (e.g. natural paper).**
	PANTONE U	**Spot colour for printing on uncoated paper.** The U stands for "uncoated".
	NEWSPAPER	**Newspaper printing.**
WEB	WEB HEX	**Web colour codes are colours that are used to design web pages.**
	sRGB	**Light colours for digital use.**
OTHER	RAL	**The RAL colours are a specialised colour chart created by the RAL Colour Institute to display different colours of paints, powder, varnish, plastics, etc.** The RAL colour chart is the standard chart used when choosing what colour to paint walls, furniture, etc..
	PMS-TCX	**Pantone colour system for textile colours.**
	COLORO	**New colour system, which PUMA uses for the coding of kit colours.** Previously, the PUMA textile colours were also stated in Pantone TCX
	MACTAC	**Film manufacturer.**
	AIR DUCT	**Special self-adhesive film used for car wrapping, for example.**
	LAB	**The LAB colour space allows the conversion of colour information from one colour system to another or from one device type to another without any losses. LAB describes all colours perceivable by the human eye.**
